

BreeZZy Rest

BreeZZy Rest™ is the newest innovation of the VPC Group. It possesses open cell memory foam properties with super soft comfort. A high density foam that can not only give you great support, but provide you with one of the softest feeling memory foams in our lineup.

The fine cell structure technology of **BreeZZy Rest™** greatly reduces pressure on key areas including the shoulder and hip. It's a remarkable improvement over regular memory foams.

Lying in bed will mean a good night's sleep, as motion is reduced and absorbed by the technological advances in the **BreeZZy Rest™** open cell configuration.

"Sleeping is no longer just about sleep. It's about Rest"

** This product is available through exclusive VPC Group customer agreement ONLY. **

Absolutely New, Absolutely Awesome!

VPC Group Inc. "Open Cell" high density exclusive sleep design

- » **BreeZZy Rest™** allows your body to enable tranquil sleep.
- » The open cell structure provides you with the feeling of sleeping on air.
- » Helps to relieve pressure points that reduces tossing and turning.
- » When pressure is applied it releases the stored air to cushion the body.
- » Passes the requirements of California Technical Bulletin 117-2013.
- » Made with zero CFC's or fillers.
- » Contains natural Bio content made with VPC Group Inc. **BioPlush™** technology platform.
- » **Exclusive availability only.**
