## Certified Foam Products from VPC Group Inc.

VPC Group Inc. has been a supplier to Canada's leading furniture manufacturers for more than 35 years. With facilities in Calgary, Montreal, Toronto, Vancouver and Winnipeg, we can meet the needs of any national or regional service and supply requirements of any regional or national customer.

As furniture specialists, VPC Group Inc. produces a full range of foams designed specifically for the furniture industry that include **ULTRA™**, and our line of **Vitalux™**. We can provide sewn backs, accent pillows, insert seating & backs and can help you determine the most appropriate grades, designs and construction processes for your needs. Our "Full Kit" ordering options include all of the foam pieces required to complete a piece of furniture, not just fibre wrapped seats. We can create unique furniture designs, deluxe "Feather" Seating design/manufacturing and complete assembly processes specifically for high-end furniture manufacturers

### Environmental Leadership

We are committed to the highest quality and production standards, keeping our environmental impact to a minimum and continually striving to find new ways to reduce this impact even further.

VPC Group Inc. carries **CertiPUR-US®** certification. This is an assurance to our customers that our focus remains on quality, performance, comfort and the environment. **CertiPUR-US®** certification requires processes and the production of products that have low-emission characteristics for the preservation of indoor air quality. Our products are made without the use of ozone-depleters, formaldehyde, PBDE's, prohibited phthalates, lead, mercury or bio-hazardous materials.

VPC Group Inc. uses **BioPlush™**, our engineered bio foam. It's comparable in comfort and performance to traditional foam, yet delivers a smaller environmental footprint, by offering less CO2 emissions, and lower manufacturing energy requirement. The result offers customers a new eco-friendly choice, to provide better products for people and our planet.
